OBJECTIVE

Seeking a Full Stack Developer role to leverage proficiency in end-to-end web development using React, Node, Express, and MongoDB. Committed to technical excellence in building responsive interfaces and optimized backend systems.

EDUCATION

Asansol Engineering College

Bachelor of Technology, Information Technology

Asansol, WB

Sep. 2023 – June 2027

Kendriya Vidyalaya Maithon Dam

Secondary and Higher Secondary

Maithon, JH

2011 – 2023

PROJECTS

Lexis | *Python, TypeScript, React.js, SQLite, FAISS, OAuth*

May 2026 – July 2026

- Developed a SAT-based Legal Graph RAG application using Python, FastAPI, React, and TypeScript, integrating REST APIs across frontend and backend layers for reliable legal information retrieval.
- Engineered the backend retrieval pipeline using FAISS, SQLite, and Groq API, handling vector search, graph-based retrieval, and LLM responses while designing for API validation, error handling, and potential failure scenarios.
- Implemented modular frontend-backend integration with reusable API workflows, enabling unit/integration testing, regression testing, bug reproduction, and improved application testability across core legal search and question-answering features.

CognitoFlow | *React.js, Node.js, Express.js, MongoDB, Octokit, Redis*

December 2025 – March 2026

- Engineered an event-driven Express.js backend that intercepts GitHub PR webhooks to trigger automated AI code reviews, processing file diffs via the Octokit REST API.
- Designed a gamification engine using MongoDB Aggregation pipelines to calculate developer XP and levels based on code quality, reducing data-processing overhead on the server.
- Built a responsive, dark-themed React dashboard to visualize lifetime user metrics, seamlessly integrating a serverless Upstash Redis cache to optimize API response times.
- Deployed a split-stack architecture, hosting the React frontend on Vercel and the webhook-listening backend on Render for continuous 24/7 uptime.

TECHNICAL SKILLS

Languages: Javascript, Typescript, Python, C/C++, SQL

Frameworks: Node.js, Next.js, Express.js, TailwindCSS

Libraries: React.js, Mongoose, Redux Toolkit, Axios, Prism.js

Developer Tools: Vite, Git, VS Code, Github, MongoDB, MySQL, Postman

Core Subjects: Data Structure and Algorithms, Computer Networks, Object Oriented Programming, DataBase Management Systems

ACHIEVMENTS

- Ranked among top 10 teams out of 50 teams in Smart India Hackathon (College Level)
